

A USEFUL ADDITION TO YOUR DAILY DENTAL HYGIENE

TRISA mouthwashes support your daily oral hygiene – even in those places that are difficult to reach. When used regularly, the unique xylitol active complex helps keep your teeth and gums healthy.

REVITAL SENSITIVE

Helps protect sensitive teeth. Refreshes the breath and provides long-lasting protection. For maximum protection, use after brushing with TRISA Revital Sensitive toothpaste.

- Protects sensitive teeth
- Helps regenerate the gums
- Prevents tooth decay
- Inhibits plaque formation
- Freshens breath

COMPLETE CARE

For strong teeth and gums. Refreshes the breath and fights plaque effectively. For maximum effect, use after brushing with TRISA Complete Protection toothpaste.

- Strengthens and remineralises the tooth enamel
- Prevents tooth decay
- Inhibits plaque formation
- Inhibits tartar formation
- Freshens breath

WHY XYLITOL POSITIVELY SUPPORTS DENTAL HYGIENE

WHAT IS XYLITOL?

Xylitol is a natural sweetener found in the bark of different types of wood. Xylitol has the same sweetening effect as household sugar and additionally has various other positive characteristics.

HOW DOES XYLITOL CONTRIBUTE TO BETTER ORAL HEALTH?

In the past, extensive studies have been carried out the effects of xylitol in dentistry – with amazing results.

- The presence of xylitol in the oral cavities slows down the production of acids in the plaque.
- Acids, amongst other things, are responsible for the development of tooth decay and the demineralisation of teeth.
- The long-term use of xylitol results in a reduction in plaque of up to 50%. Accordingly, xylitol contributes towards a reduction in bacteria causing tooth decay, primarily of Streptococcus mutans.

UNIQUE FORMULATIONS FOR YOUR DENTAL HEALTH

The combination of active ingredients with xylitol, Swiss herbs and fluoride provides efficient caries protection for professional and daily oral hygiene. Well-balanced combined into three unique formulations: For sensitive teeth, for white teeth and for all-round protection. Effectiveness clinically confirmed. 100% safe ingredients.

- ✓ No SLS
- ✓ No TiO₂
- ✓ No PEG

Without loss of effectiveness and taste.

REVITAL SENSITIVE

TRISA Revital Sensitive toothpaste revitalises the gums and is particularly gentle on sensitive teeth. At the same time, the sodium monofluorophosphate provides efficient protection against tooth decay, inhibits the formation of new plaque and strengthens tooth enamel.

- Revitalises the gums
- Protects teeth against sensitivity
- Provides efficient protection against tooth decay
- Inhibits plaque formation
- Strengthens the enamel
- Freshens breath

PURE WHITE

TRISA Pure White toothpaste helps remove discolouration and whitens the teeth efficiently. The unique whitening crystal formulation provides effective protection against tooth decay and helps prevent plaque – for naturally white teeth.

- Helps remove discolouration
- Brightens teeth effectively
- Provides efficient protection from tooth decay
- Inhibits plaque formation
- Freshens breath

COMPLETE PROTECTION

TRISA Complete Protection toothpaste offers all-round protection for the teeth during daily oral hygiene. The gentle formulation with the new xylitol active complex reduces the formation of plaque and tartar.

- Protects against tooth decay
- Remineralises the enamel
- Inhibits plaque and tartar formation
- Strengthens the gums
- Inhibits bacterial growth
- Freshens breath
